SPECIAL CATALOGUE

Bargain Sale Edition

EVERYTHING AT REDUCED PRICES

Roses, Bedding Plants, Summer Flowering Bulbs, Etc.

The prices we have made in this book are so low and this catalogue so different from any other ever published that we feel sure it will be read from cover to cover.

Parcels Post Heretofore the limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcels Post simply gives the added privilege of transferring through the mails, packages of mailable plants, bulbs, seeds, etc., of weight up to eleven pounds. Do not construe this to mean, however, that the increased size of package allows carrying express size plants. It only permits of sending you larger orders of mailable plants.

A New Kind of Catalogue

The distribution of this catalogue will open the greatest Special Bargain Sale in the history of our business and will offer some of the greatest bargains in Roses, Bedding Plants, etc., that have been presented this season. Most floral catalogues are very much alike. This one is entirely different. The flowers are illustrated in their natural colors and offered in collections which makes ordering extremely simple.

Why We Can Save You Money

All of our goods are grown in large quantities for wholesale purposes. Our retail prices are based on our large production, giving our retail customers an easily appreciated advantage. By adopting the plan, special offers and collections, we reduce our selling expense to a minimum and as our sales to you are by mail, execution of the orders are attended with comparatively little expense.

McGregor Quality

This saving is put into better care of the plants, etc., maintenance of "McGregor Quality," and giving you lower prices than those for which you can buy corresponding quality from a retail dealer.

Order Early

It makes it much easier to fill your orders promptly and to give you better plants if you order early, before the stock runs low. If you do not want the plants at the time you order them, because it is too cold, or you are not ready for them, simply state when you want the goods shipped. We will set aside your plants and take care of them until you are ready for them. If nothing is said about holding them, we try to ship them the same or the next day after receipt of order.

Plants by Mail

All stock listed in our catalogue, unless noted, is offered at prices marked, by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States.

Springfield Gives Lowest Express Rates

Only where all the Express Companies are represented, as at Springfield, can the lowest Express rates be given.

Remittance With Order

Please send sufficient money to cover your entire order. The safest way is by means of postoffice orders. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at all postoffices. The fee is but five cents for \$5.00 and under. While we assume the risk of paper money carefully sealed in our self-addressed envelopes, silver money, except in registered letters, is at the risk of the sender.

THE MCGREGOR BROS. CO., Florists and Seedsmen, Springfield, Ohio, U. S. A.

Springfield is the Plant Growing Center of the World.

If So Instructed We Will Send **\$3.00 Orders** or larger by Prepaid Express Provided we are allowed

To remove the soil, or ball of earth, from the roots of the plants. This places the shipping of the plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except, however, on orders for such plants as Cycas, Palms, Ficus, Araucarias, Camellias, Rhododendrons, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Such plants as these must be shipped without the root being disturbed if one must expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchsias, Lilies, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far-away sections of our country with the soil removed and transplanted safely. This offer or special inducement is, therefore, made mainly to secure orders from these far-away points where express charges are high and form a barrier to ordering.

Free Offer If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the outside of cover of this book, free and postpaid. If order from new customer amounts to \$2.50 we will send you any three of the Roses shown in colors on outside cover of this book. If order amounts to \$5.00 from a friend or neighbor, not now a customer, we will send you the six Roses on outside cover of this Catalogue.

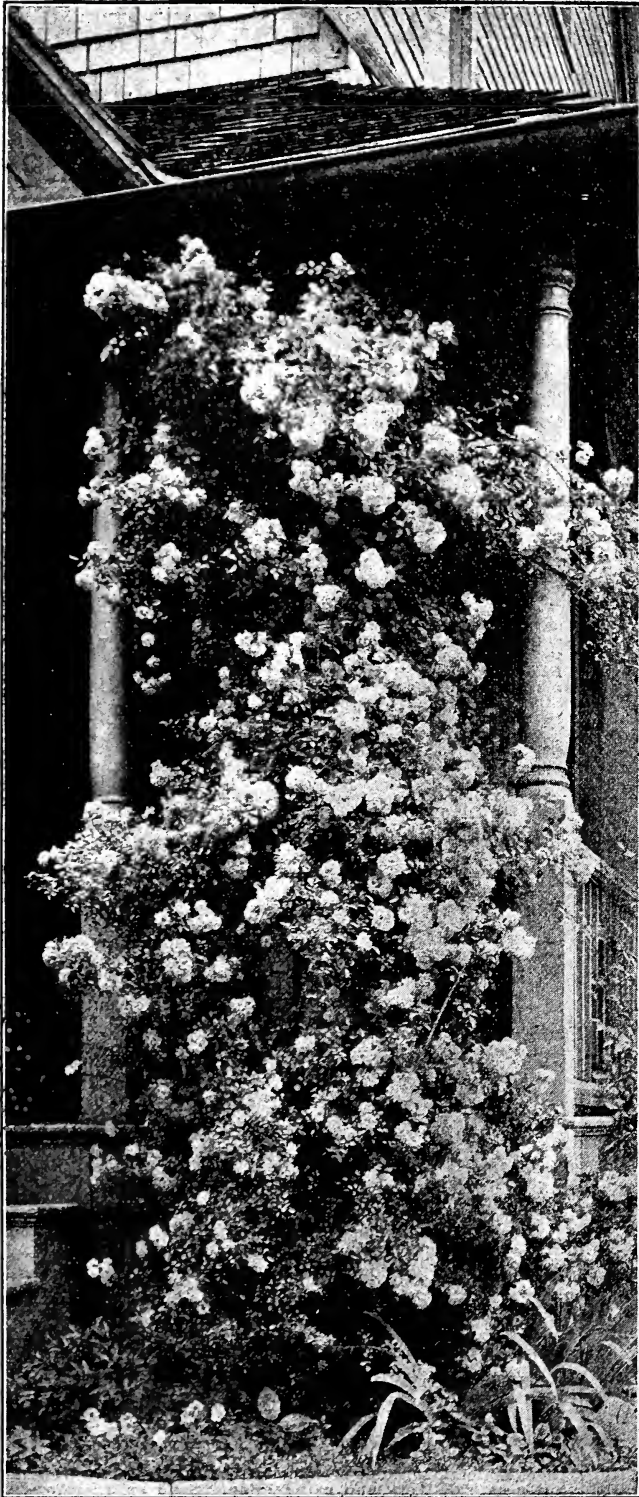

Premiums Our terms being Cash with the order enables us to give additional plants on orders amounting to \$1.00 or more.

as follows:
On 98c worth of goods bought at single rates, select to the value of.....\$0.19 extra
{ These premiums cannot be allowed } \$1.98 .38 extra
{ On Special Offers, Collections or } 2.98 .58 extra
{ goods bought at dozen rate, or Seeds } 3.98 .78 extra

The above additional premiums will be allowed on mail and express orders and larger orders in proportion.

Surprise Offer for Decoration Day

Manufacturing or propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for the natural increase of business. As a result we generally have for Decoration Day planting a surplus of all kinds of plants and rather than carry this stock over for another season, we hold a Clearance Sale and make up Surprise Collections of miscellaneous plants at 98c per collection, six collections for \$4.88. In these 98c collections we give several dollars' worth of plants. The plants in these collections must be strictly of our selection. We guarantee safe delivery and satisfaction. Send us, therefore, at any time, 98c, and we will enter your order for one of these collections for shipment between May 15th and May 30th in time for Decoration Day planting. This is probably the best offer we make in our Catalogue.

The National Rose of America The American Beauty The Greatest of Them All

(Hardy June blooming, should be protected.) A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals takes the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. (See illustration and prices.)

Lemon Verbena

A universal and well known favorite, grown principally for its deliciously scented foliage. 14c each; 3 for 39c; \$1.24 per dozen.

When the people throughout the country were vainly seeking for an appropriate flower, acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue. While it is generally conceded that the Rose ranks first for producing flowers for cutting, the Carnation is gaining in popularity for its profusion of bloom, easy culture, and for the exquisite fragrance of its flowers. The last few years have seen an entirely new Carnation, forming one of the most beautiful and desirable flowers we have, flowering freely during the summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter. We take pride in offering the following collection:

The Ideal Decorative Plant

The Roosevelt Fern

The Most Notable and Valuable Novelty Introduced in Many Years. Creates a Sensation and Wins Highest Prizes Wherever Exhibited.

Probably never in the history of horticulture has a plant been introduced that has received the universal admiration, praise and place that has been accorded the decorative Fern. The popular Boston Fern has had the most phenomenal sale of any decorative plant that has ever grown. The new variety, Roosevelt, is much more attractive than the Boston. The fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. The plant assumes an exceedingly massive yet graceful appearance.

It is wonderfully valuable, not only on account of its beauty, but also on account of its ease in culture, hardiness and general adaptability. It has all the free-growing, hardy characteristics of the Boston Fern, and, like that plant, is equally suitable for house culture and a much more beautiful plant for greenhouse and conservatory decoration; in fact, it is a plant that appeals to everyone.

We offer well established plants at 14c each; 3 for 39c, postpaid; strong plants, 29c each; 3 for 79c, postpaid; larger plants, 49c each; 3 for \$1.24, postpaid. Specimen plants, 74c each; 3 for \$1.99. (The largest sizes of these Decorative Ferns should be sent by express.)

McGregor's Fancy Bedding Coleus

The Coleus, a plant very familiar to all, is one which, for bedding purposes, cannot be excelled. The foliage is very beautiful in many of the good newer sorts, and shows a great variety of markings and fine combinations. Being easily propagated from seed or from cuttings, it is used in great quantities in private places, in small gardens and in the public gardens and parks. The Coleus is used to best advantage in planting in ribbons of color in the borders along drives, in beds of various shapes, such as stars, crescents, triangles, circles and squares, as the foliage, being of such various colors, can be used with striking effect. Light colors against dark, with borders of contrasting color, which are easily obtained among the yellow, red, striped, mottled, brown, blue-black, plum and other colored sorts, secure effects when used on a fine lawn or in the border, hard to make with other plants.

The Coleus thrives best in a rich, sandy soil, composed of two-thirds good field soil and balance equal parts of sand and manure. In selecting a location for Coleus beds, avoid shady places, for when planted in the shade, the colors will not be brought out so beautifully as when out in the full sun. Plant four to eight inches apart.

Price for any of the following named varieties (except where noted), 6 cents each; 3 for 17 cents; 5 for 29c; 25 for \$1.33; 100 for \$4.98. (Purchaser may select one or more varieties.)

The Grand New Dwarf Nephrolepis

"Teddy Junior"—14c

(The Fern for every household)—This magnificent Fern is a sport from the now famous Roosevelt Fern, and while its habit of growth is to produce a shorter frond it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. It is such a compact, vigorous grower that it will thrive under most adverse conditions making an exceptionally rapid growth and producing a plant of rare beauty and perfection in the average dwelling house without special care or attention. Owing to its habit of producing the great quantity of massive foliage in small pots, this Fern makes the finest pedestal plant ever produced, and will prove indispensable for decorating dining room or library tables and numerous other places in the home where limited space will not permit using large pots or varieties with longer fronds. As a table-decoration, Fern growers can appreciate a dwarf variety that will produce forty to fifty fronds twelve to fifteen inches long in a four-inch pot. Young plants, 14c; strong plants, 24c; extra strong plants, 49c.

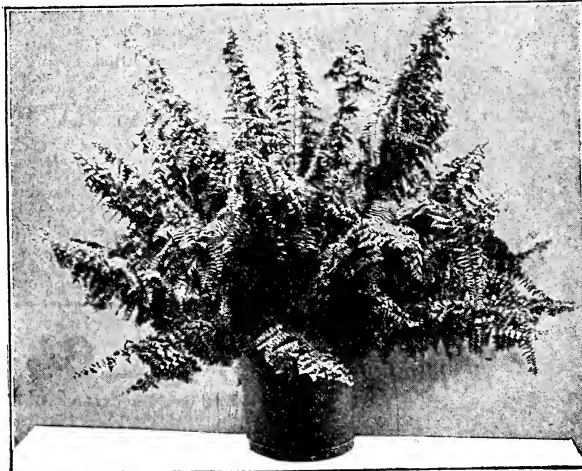

The Ostrich Plume Fern, Whitmanii, 14c, 34c, 49c.

The Dwarf Roosevelt Fern, Teddy, Jr., 14c, 24c, 49c.

The Newport Parlor Fern

(Nephrolepis Scotti)—It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about twenty inches and three inches in width at the widest point, being more finished than the parent. Nice young plants, 19c each; medium size, 29c; larger plants, 49c.

The Ideal Plumed Fern, Scholzei, 14c, 29c, 49c.

SPECIAL OFFER—We will send postpaid one each of the Ferns on this page (not including the Hardy Fern), in the small size, four in all, for 47c. One each of the four Ferns on this page, in the medium size, for 93c. One each of the four Ferns in the largest size for \$1.63.

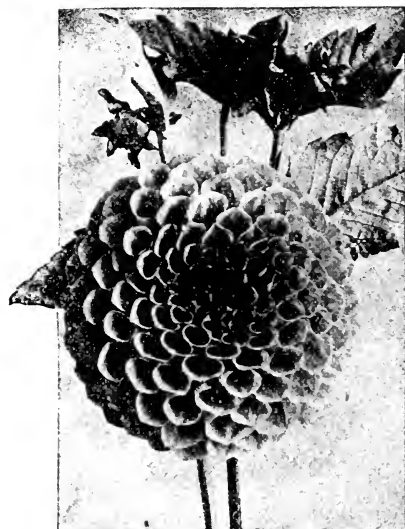

The Plumed Fern Scholzei—14c

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Nicely shaped plants, 14c; larger sizes, 29c and 49c.

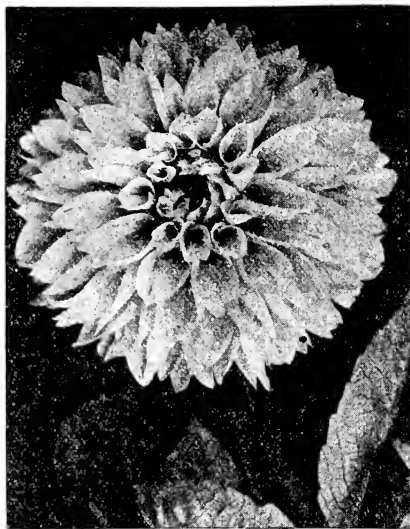

Hardy Ferns for Shady Places

These graceful and universally popular plants are of easy culture and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still, if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. 24c each; 3 for 69c; 6 for \$1.34; \$2.49 per dozen, by express only.

Four Special Hardy Climbing Roses

The Wonderful Hardy Climbing
Rose—19¢

Dr. W. Van Fleet

The Wonderful Hardy Porch
Rose—18¢

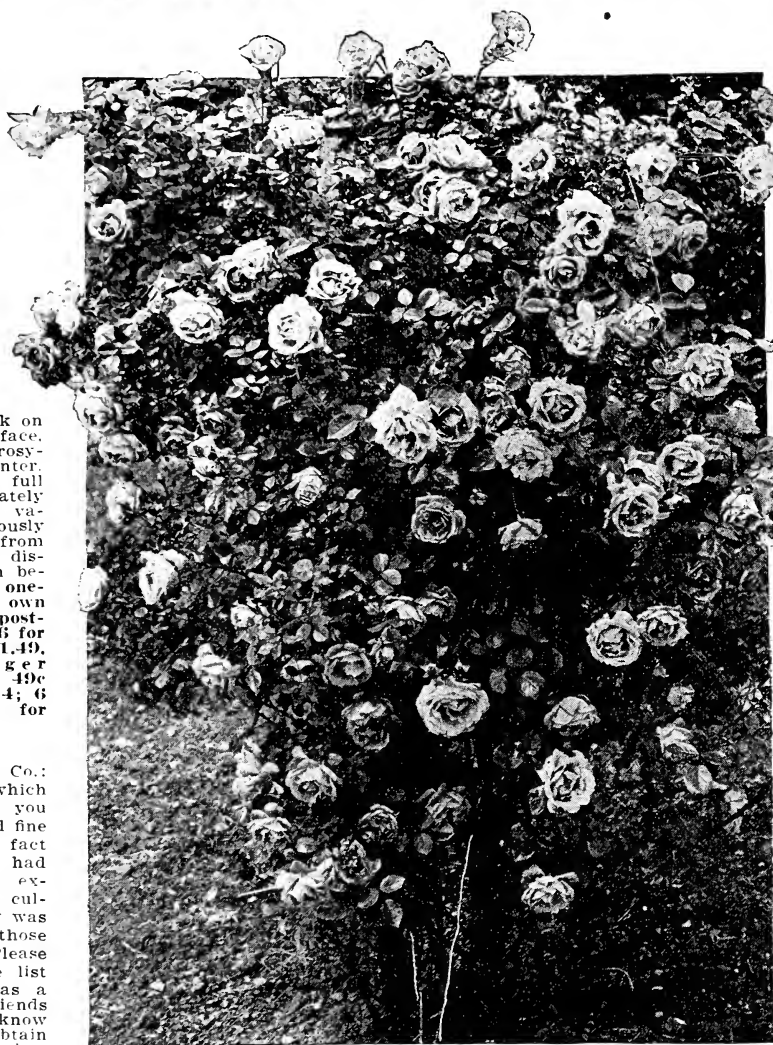

Climbing American Beauty

Hardy Summer
Blooming.

Dr. W. Van Fleet stands at the very head of the Climbing Roses. Nothing like it has ever before been produced. Its parents are the lovely sea-shell pink Rose, Souvenir de Pres, Carnot, and the fast-growing climbing or trailing pure white memorial Rose, Rosa Wichuriana. The flowers, when open, run four inches and over in diameter—borne in profusion. The color is a very delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, delicately perfumed. The variety grows vigorously and is immune from mildew and other diseases which often befall roses. Strong one-year plants on own roots, 19¢ each, postpaid; 3 for 49¢; 6 for 89¢; 12 for \$1.49, postpaid. Stronger 2-year plants, 49¢ each; 3 for \$1.24; 6 for \$1.99; 12 for \$3.74.

McGregor Bros. Co.: The Rose plants which I received from you last spring all did fine in spite of the fact that I had not had much previous experience in Rose culture. It certainly was a marvel to see those climbers climb. Please send me a price list of your Roses, as a number of my friends are anxious to know where they can obtain Rose plants like mine.

Miss M. F., Ohio.

Climbing American Beauty, 18¢.

Hardy June
Blooming.

(See Illustration.)

Flowers are single, about three inches in diameter and a light pink in color. This Rose is perfectly hardy, has a fine foliage that does not burn with the sun, and its thick, glossy leaves keep on the bush all summer, which gives it a pleasing appearance. Immense blooms measuring three to four inches in diameter; and each one is invariably produced on a separate stem. The color is glowing crimson-red, the real American Beauty color. The foliage is magnificent and is an important feature in Climbing Roses, for without healthy, leathery foliage any climbing rose is a failure, because it is unsightly. This beautiful Rose is absolutely hardy in all localities. Price, nice strong one-year-old plants, 18¢ each; 3 for 49¢, postpaid; two-year-old plants, 49¢ each; 3 for \$1.29.

McGregor Bros. Co.: The Climbing American Beauty is growing at my own home, "Breeze Hill," and was put just where you see it in the picture. It grew like all possessed. All the growth you see and a good bit more that you do not see has happened since, and this Rose was some sight last June.

J. H. McFarland, Pa.

Feather Fern (Asparagus Sprengerii), 14c.

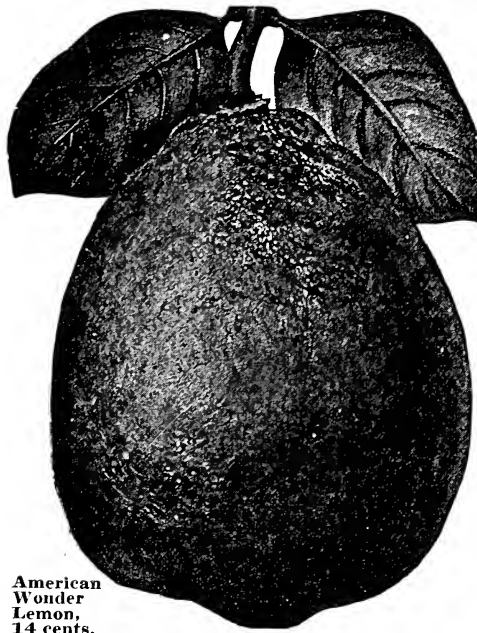

J. S. B., Dumfries, Va.: "The Wonder Lemon received sometime ago, and it certainly is well named. It is a wonder."

Louis Melcher, El Campo, Texas: "How is this for a Lemon Tree? It is the Ponderosa kind. The tree had 125 lemons on and the largest one weighed nearly three pounds and measured seventeen and one-half inches in circumference. It was bought from you four years ago and stands out in the open in our yard."

Asparagus Plumosus (Feather Fern), 14c, 24c.

American Wonder Lemon—14c

American Wonder Lemon, 14 cents.

Actual Weight of Fruit Two to Three Pounds

A true everbearing Lemon. The tree has fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true everbearer. Fruit weighing over 4 pounds has been taken from a tree. The American Wonder Lemon far excels the ordinary lemons for making pies. The plant is of very easy culture, flowering and fruiting in ordinary good soil. Flowers are as fragrant as orange blossoms, which they greatly resemble. The plant does best under heat and moisture. The growth can be pruned to any size or shape that is desired without affecting its blooming or fruiting qualities. During the winter when the plant makes comparatively little growth the soil or potted plants should be kept rather on the dry side and the leaves and stems sponged weekly with a strong solution of ivory soap. 14c each; 3 for 39c; larger plants, 24c each; 3 for 59c; extra large 2-year-old plants, 38c each; 3-year plants, 74c, by express only.

Asparagus Plumosus—14c

(Lace or Feather Fern.) One of the handsomest of our foliage plants. The leaves are bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality, when cut, is remarkable, retaining their freshness for weeks. Surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. Easily grown as Smilax. The plants trained on trellises or string will run in height to twenty-five or thirty feet, and for festooning and decorating it is without equal. Price, nice plants, 14c each; 3 for 39c; large plants, 24c each; 3 for 58c.

Asparagus Sprengerii—12c

(Trailing Basket Fern.) When introduced, at a high price, this plant was received with some hesitation as to its desirability, but after only a limited trial it has come forward with such prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large Roses, etc., but grown in suspended pots, it makes one of the prettiest decorative house plants we know of. 12c each; 3 for 34c; \$1.24 per dozen; large plants, 24c each; 3 for 58c; \$2.24 per dozen.

MAMMOTH FLOWERING BUTTERFLY PANSIES

There is no flower more beloved, admired and even adored, than the Pansy; no flower border, be it ever so gay and gorgeous, is so interesting. The combination of colors in the same flowers is exquisite and wonderful, and yet so delicate that no description can convey an adequate idea of their beauty, embracing so many varieties—striped, spotted, bordered and fringed; in rainbow colors, with rich, velvety textures; some light yellow with deep violet spots, the upper petals carmine, edged with white, yellow with crimson-maroon spots and blue rims; deep blue with yellow center, edged black; violet with white center and carmine edges; brown and golden-bronze; jet black; ultramarine blue; pure white, intense yellow. Its culture is not at all difficult and may successfully be attempted by anyone inexperienced in horticultural affairs. Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well-rotted manure and soil. **Price, 24c per dozen, \$1.98 per hundred.**

Norfolk Island Pine (Araucaria), \$1.24.

Rubber Plant—49c

(Ficus Elastica) — Ficus Elastica, better known all over the country as the Rubber Plant, is undoubtedly one of the most popular and satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderfully thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a showy appearance. It is particularly adapted to house culture and for porch decoration. Large plants by express, 49c.

Dracena Terminalis, 24c, 49c.

Norfolk Pine—\$1.24

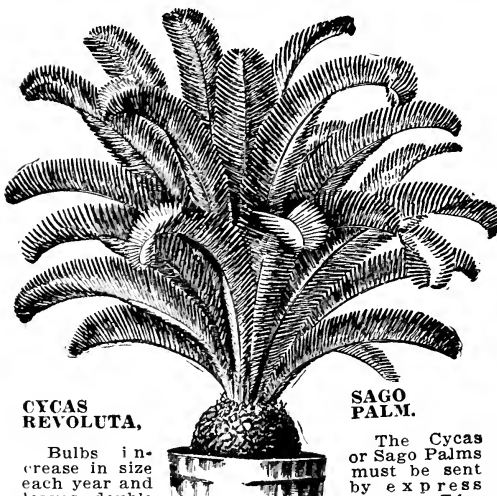

(Araucaria Excelsa)—As a decorative plant for the house this is one of the handsomest and most serviceable. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage is unequaled. Easily grown and highly ornamental. We offer fine selected stock, especially in the medium size, for which there is always demand. The plants withstand drought and neglect to an unusual extent. The soil in the pot from top to bottom should be kept evenly moist, but not continually soggy. During the heat of the summer, to keep up the proper growth, the plants should be kept in practically total shade and syringed constantly and not allowed to dry out for any great length of time. Nice large plants, 4 tiers, 15 to 20 inches high, \$1.24, by express only.

Cycas—74c

(Sago, or Japanese Fern Palm)
—For years the price of the Sago Palm has placed it beyond the reach of ordinary plant buyers. We have imported a fine lot of Cycas from Japan and offer them very low so as to be within the reach of all. It is probably the most valuable decorative Palm grown. Resists alike gas, dust and changes of temperature to which house plants are frequently exposed. Must be sent by express, too large to mail. Nice, small, shapely plants, 74c; 6 to 8 leaves, 99c each; 8 to 10 leaves, \$1.49; 10 to 12 leaves, \$1.99.

Pandanus—49c

Mammoth Flowering Lily of the Valley. 4c each; 47c per dozen.

Lily of the Valley

(Mammoth Flowering)—The sweetest and loveliest spring blooming plant, producing delightfully fragrant blooms. Will thrive in any common soil and do well in shady places where many other plants fail. The plants are too often starved and neglected and relegated to some poor, out-of-the-way corner; but this popular and fragrant subject, like most other plants, repays for being well treated; and if the bed is given a liberal top dressing of well decayed manure, along in February or March, it will show the effect by increased size, number and vigor of the flowers. We offer strong plants especially suited for outdoor planting, which should be done as early in the season as possible. Price, 4c each; 6 for 23c; 47c per dozen; \$3.25 per hundred.

Summer Flowering Callas

PLANTING INSTRUCTIONS—The varieties offered below succeed best when treated in same manner as Gladiolus, Tuberoses and other summer-flowering bulbs. They should be planted in the open border in a dormant condition when danger from frost is over in spring, and will then flower during the summer months. When the tops are killed by frost in the autumn dig and store through the winter as you would potatoes. Callas do equally well in pots. Supply drainage, fill base pot with well rotted manure and fairly light soil. When bulbs have been well started into growth give them a good mulch.

White Calla

(New Godfrey)—A wonderful improvement over the old White Calla. The plant is very bushy, having double as many leaves as the old variety, and producing three times as many flowers. Flowers are unusually large, held high, and on stiff stems. After the summer growing season, the bulbs can be taken up in September, given a slight rest, and will flower through the winter. The same plant will grow and bloom for years and the quantity of flowers this variety will produce is astonishing. It is estimated that several plants of the old variety will not produce as many blooms in a single season as this more recent introduction. The blooms are of large size and of snowy whiteness. 19c each; 3 for 49c; 6 for 98c. Large bulbs, 39c each; 3 for 98c.

The Yellow Calla Hastata, 24c. Blooms both in and out of doors, beautiful lemon-yellow flowers.

The White Godfrey Calla, 19c. Wonderful improvement over the old White Calla; bloom of snowy whiteness.

Yellow Calla

(Calla Hastata)—The flowers are clear lemon-yellow, produced freely on long stems. The foliage is deep rich green, and the plant is quite showy. It does well planted outside, strong growing and blooming freely. This new variety is a genuine Calla, and is cultivated the same as the Common White Calla. It has the habit of the more dwarf sorts by blooming when quite small. Treated as a summer flowering bulb it will bloom as well outdoors as within. 24c each; 2 for 39c; \$2.24 per dozen.

Grand Improved Yellow Calla Elliottiana, 34 cents.

Orange-Yellow Calla

((Calla Elliottiana)—This is the great new yellow Calla of marvelous beauty. Flowers are very large, rich, deep orange-yellow, often four to five inches across the mouth, leaves are spotted with white. Handsome foliage, together with remarkable flowers. Large flowering bulbs, 34c each; 3 for 99c, postpaid; \$3.49 per dozen, by express.

Dragon Arum—19c

(Arum Dracunculius)—This plant has the honor of producing the largest flower of any plant that is hardy in this country. The leaf, stem and flower stalks are all spotted; upon the top of the latter opens a flower of gigantic size and curious color. The center of the flower is of a glossy purple-black color. Good bulbs, 19c each, postpaid; 3 for 49c; extra large bulbs, 28c; 4 for 99c.

Giant Flowering Black Calla, 19c.

New Ever-Blooming Begonia, Gracilis Luminosa

This splendid new variety is of very sturdy and even habit, growing about 10 inches high and forming a freely branching bush 10 to 12 inches across; a ball of flowers. Uncommonly large flowers which are of a beautiful rose color shading to carmine towards the center. The flowers are borne on strong short stalks and bear extremely early. Price, nice plants, 14c each; 3 for 39c; \$1.24 per dozen.

Mammoth Leaved Rex Begonia

"The Most Decorative of the Begonia Family."

The Rex division of the Begonia family has been a great favorite. In no other class of plants do we find the rich metallic foliage, lustre and various colors so satisfactorily blended as here. We find colors of bright green, silver colored, reddish-bronze, as well as varieties of bright rosy plum color. The plants are grown exclusively for the great beauty of their foliage. The Rex Begonia dislikes our dry atmosphere and bright sunshine, and thrives best in a rather shady and moist situation. The soil should be as near as possible of the nature of a mixture of loam, sharp sand, and well rotted cow manure. Price of Rex Begonia, good, strong established plants, 19c each; 3 different varieties for 49c; \$1.74 per doz.

Begonia Jessica

A strong, vigorous grower; flowers borne in immense clusters; color pure white; excellent. 19c each; 3 for 48c; \$1.74 per dozen.

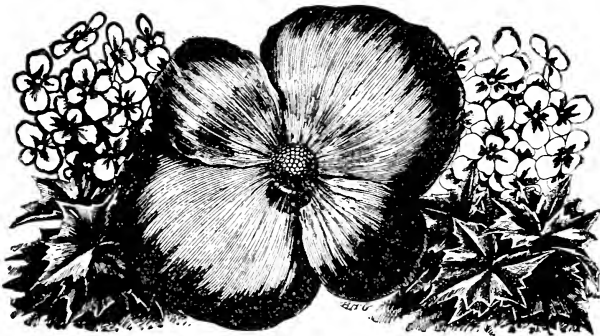

The Giant Leaved Rex Begonia Rubrum, 14c, \$1.48 per dozen.

Single and Double Begonias, Tuberous Rooted

"The Ideal Plant for Shady Places—Nothing Can Surpass Their Brilliancy of Colors."

These are among the very handsomest of our summer-blooming plants, flowering throughout the season in any nook or corner in complete shade. Nothing can exceed the brilliancy of their colors, the richness of their waxy flowers or their graceful appearance in beds or borders. On the approach of cold weather they should be taken up, and the bulbs stored away in a warm place until the spring, when they may be started in pots before planting in the garden. We offer double and single flowering bulbs in five colors; white, orange, pink, yellow and crimson. 14c each; 2 for 24c; 6 for 74c; \$1.34 per dozen.

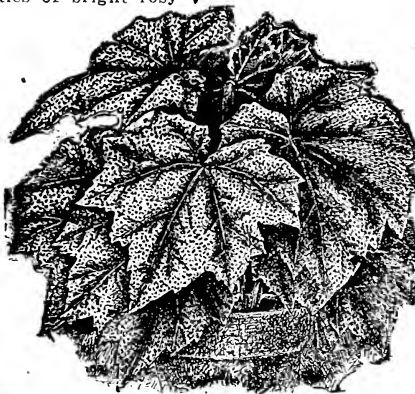

Tuberous Rooted Begonias.

Crested Tuberous Begonias

Extra Large Three-Year-Old Roses

In this Collection we have grouped together 12 of the finest Garden Roses for summer blooming. They make up a collection of Hybrid Tea Roses, which class is rapidly taking the foremost rank, having been produced by crossing the free flowering Tea Roses with the Hardy June Flowering or Hybrid Perpetual classes. This collection not only combines the free flowering habit of the Tea Rose with the rich and varied colors of the other classes, but also inherits unusual hardiness. The collection shows the wonderful results achieved by the most noted Rose specialists of this country and Europe. Not only does the collection represent all colors known in Roses, but shows many beautiful shades and color combinations not found in the ordinary varieties. We believe the collection to be one of superior merit and especially adapted to our climatic conditions. Each and every variety a perfect gem in its particular color and form.

"Considered a Most Unusual Rose."

This is a charming Rose of golden coppery-rose, suffused with a golden sheen. On account of its coloring a bed of this Rose would make a most attractive sight. The variety is extremely free flowering and has a very nice habit of growth. It is sweetly perfumed, attractive and decorative.

A gorgeous beautiful Rose, the pointed bud colorings of which are deep saffron-yellow, flushed reddish-copper, edged with bright orange-pink; as the buds develop the edge of the petals is deeply zoned intense orange. The variety is of vigorous branching growth, and coupled with its free flowering qualities will make this Rose a popular favorite.

Climbing vines are as necessary to the comfort and beauty of a home as the trees and shrubs we plant about it. We offer a collection of the hardiest and best vines, those that have real merit and sterling worth.

LARGE FLOWERING CLEMATIS 49c

Clematis require rich, deep soil, good drainage, abundance of water, and should be planted so that the crown of the root is three or four inches beneath the surface of the soil. The vines are of slender, wiry growth and require some support that they can twine around, like a rod, pole or wire, and if the location is somewhat moist and partially shaded, so much the better.

CLEMATIS JACKMANII—The best known variety, with large violet-purple flowers, remarkable for their velvety richness. Extra strong plants, 49c; 3 for \$1.24.

CLEMATIS HENRYII—Fine large creamy-white flowers, strong growing, and one of the best. Extra strong plants, 49c; 3 for \$1.24.

5 GRAND HERMOSA ROSES

Popular Pink Hermosa

"Hardy as a Lilac; free-flowering as a Geranium."

Pink Hermosa is the best known in the entire Rose family and a universal favorite. Hardy as a Lilac bush and as free-flowering as a Geranium; it combines everything most desirable in a Rose. The flower is cupped, finely formed and full, color a most pleasing shade of pink, soft but deep, very fragrant. 13c each, 3 for 38c; 12 for \$1.23, postpaid; 2-year plants, 28c each, 3 for 78c, 12 for \$2.73.

White Hermosa

"We counted on one plant 143 buds and flowers."

This is a lovely white Rose, a pure Tea, but a foreign seedling; the freest flowering white Rose we have seen. For a pot plant it cannot be excelled as it possesses every good quality of a pot Rose. We counted on one plant 143 buds and flowers, and the plant was only nine months old. Try it. 8c each, 3 for 23c, 12 for 88c; 2-year plants, 23c each, 3 for 63c, 12 for \$2.48.

Yellow Hermosa

"No Rose like it for freedom of bloom."

No Rose like it for freedom of bloom. It is a fine grower and carries numbers of flowers on every shoot. A fine yellow Rose, large, not at all formal, but very attractive. Called the Yellow Hermosa from its free-flowering character. We do not know of any Rose that will give the satisfaction that this variety will and we heartily recommend it. 13c each, 3 for 38c, 12 for \$1.23, postpaid; 2-year plants, 28c each, 3 for 78c, 12 for \$2.73.

Red Hermosa

"Unmatched in its velvety richness."

The flowers of this variety are the richest red of any Rose in our vast collection; a single bud or blossom will catch the eye at a great distance so brilliant is the color. Indeed, it is unmatched in its velvety richness; could well be termed "The Velvet Rose." It is as free in blooming as Bon Silene. One of our customers in California writes that she is kept busy by people asking her what Rose this is. 13c each, 3 for 38c; 12 for \$1.23, postpaid; large 2-year-old plants, 28c each, 3 for 78c, 12 for \$2.73.

Crimson Hermosa

"The very best of all Roses for bedding."

This is, without doubt, the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery-scarlet, a color seldom seen in Roses. Indeed, a bed of this Rose produces a mass of red equal to a bed of Geraniums. None better. Try it. 8c each, 3 for 23c, 12 for 88c; large two-year-old plants, 23c each, 3 for 63c, 12 for \$2.48.

SPECIAL OFFER One each of the five Hermosa Roses, 1-year plants, postpaid, for 48c, 3 collections for \$1.42; one each of the five Hermosa Roses, 2-year plants, for \$1.23, 3 collections for \$3.48.

The Hermosa Roses are unexcelled as bedding Roses. They will produce Rose Buds to cut all summer.

Tall Ivy-Leaved Mixed

The plants are of running growth, with star-like pointed leaves of rich green, veined with white, so the young shoots, where the leaves are set closely together, have a marked resemblance to the foliage of the hardy English Ivy. NEW DWARF GOLDEN-MIDNIGHT—One of the most beautiful novelties yet introduced. The contrast between the clear golden-yellow foliage and extremely dark flowers is most remarkable. McGREGOR'S MIXED DWARF NASTURTIUMS—5c per packet, 9c per oz., 29c per quarter pound.

A "packet" of Nasturtiums usually contains from 50 to 70 seeds; an ounce from 200 to 300 seeds.

Special Notice As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all Nursery Stock orders be shipped direct from the Nursery. When offered by mail, postage is paid by us; if by express, charges are to be paid by the purchaser, but larger stock will be sent. Prices on Nursery Stock are placed very low and we cannot allow premiums to be selected on orders for small Fruits or Fruit Trees. The trees offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received before they can be planted they may be safely kept a reasonable length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruit early, that they may be planted out before the foliage starts.
